

WE NEED LITTLE SCIENTISTS!

Dear parents, there is no better way to inspire your kids to get a head start in mathematics and science than to participate hands-on in a cutting edge research!

Researchers at the National University of Singapore, in collaboration with CMA, will be conducting experiments at various centers on abacus & mental arithmetic!

We are looking for children ages 6 to 7 to take part in this enjoyable process of discovery. The experiment consists of a short written exam and interview. There is absolutely no risk to your child at any time! Your kids will have a chance to see what it is like to do scientific research in a fun and engaging way. Please join us and approach our centers for more information!
